THE NEW CAMPBELL SYSTEMS  
FOR THE IBM PC/XT/AT  
All programs transfer, store, display and control  
data from remote sites, process and analyze  
data locally, and do the house

## MASTERFILE

Masterfile is a powerful, flexible, and easy-to-use database management system for the IBM PC/XT/AT. It allows you to create, store, and retrieve data from a variety of sources, including spreadsheets, text files, and other databases. Masterfile is designed to be used in a variety of ways, from a simple data entry system to a complex database application. It is a powerful tool for anyone who needs to manage data efficiently.

## New Masterfile II

Masterfile II is the next generation of Masterfile. It adds many new features, including a new user interface, a new query language, and a new reporting system. Masterfile II is designed to be even more powerful and flexible than Masterfile. It is a powerful tool for anyone who needs to manage data efficiently.

IBM, PC, XT, AT, and compatible hardware. IBM and compatible software. IBM and compatible operating systems. IBM and compatible printers. IBM and compatible modems. IBM and compatible network cards. IBM and compatible disk drives. IBM and compatible tape drives. IBM and compatible backup software. IBM and compatible backup hardware. IBM and compatible backup media. IBM and compatible backup software. IBM and compatible backup hardware. IBM and compatible backup media.

**CLIPMAN**

CLIPMAN is a powerful, flexible, and easy-to-use database management system for the IBM PC/XT/AT. It allows you to create, store, and retrieve data from a variety of sources, including spreadsheets, text files, and other databases. CLIPMAN is designed to be used in a variety of ways, from a simple data entry system to a complex database application. It is a powerful tool for anyone who needs to manage data efficiently.

**CLIP**

**THE FASTONE**

THE FASTONE is a powerful, flexible, and easy-to-use database management system for the IBM PC/XT/AT. It allows you to create, store, and retrieve data from a variety of sources, including spreadsheets, text files, and other databases. THE FASTONE is designed to be used in a variety of ways, from a simple data entry system to a complex database application. It is a powerful tool for anyone who needs to manage data efficiently.

# SOFTWARE FROM MR. CHIP

For the compacted VIC II

**ANIMULATOR** Paced the rocky waters of a classic  
platform following you command. \$9.95

**NIGHT-CRAWLER** Chase your vehicle into "THE  
GREEN FOREST" \$9.95

**PROFESSOR (Pong)** Bring the famous yab game home  
\$9.95

**SCRAMBLE** Guide your craft through many perils to get  
to your "HOME BASE" \$9.95

**ADVENTURE PACS** Move, Run, Fight, and Conquer  
A Dinosaur \$9.95

**SPACE FRONTIER** Triage across the Cosmos and take  
many alien creatures down with a Space  
Pistol \$9.95

**QUICKSHOTS** Step right up and welcome to the shooting  
gallery \$9.95

**DETAILED** Create your own custom film \$9.95

**BANKMANAGER** Computerize your bank account \$9.95

**M/C EDIT** Machine code editor and disassembler, any  
processor, any \$9.95

**CHARACTER EDITOR** With map and window  
facility \$9.95

# IN BRIEF

Turn your Spectrum into a word processor, yours company, which has brought out a Commodore-type interface module.

It plans like the back of the computer user, via a printed cable, with the words of many short phrases.

The interface called ZXC LIFEWIT, costs £6.95 (plus £2.50).

Commodore John Hayes, Gayleil Jones, Commodore One 01/91 263.

• • •

Commodore plans to order 100,000 computers a year in its new Office Society in Corby, Northants.

By the end of the year, says the company, 200 people will be employed there assembling 10,000 and Commodore will be the UK, with the surplus being exported.

Commodore Richard Mathias 0191 470 4000, Watling Street, Brough, Leeds YO1 1AB.

• • •

David Patterson, head of only word company Silversoft, has discovered a bug in his — pricing.

David, who said "I've always wanted to buy back the change in five weeks ago at a pricing date near his home in Wiltshire, the request is so much that he decided to go back to his work."

He said "During, I plan to write in an addition to Silver."

# BUY THIS SPACE

To advertise your latest product!  
Only 4 weeks in Home on  
01-427 5887 NOW!

Customers' price listed for us — but in my mind we will be in production, but it's a lot closer than now!

The publisher's usual policy, only for products from Commodore, but it would be possible for software houses to sell programs on them.

A first batch of letters and orders from would go out in a 100,000 word order Spectrum buyers. Followed by the rest of the 100,000 and a complete 100,000 before the letters were filed.

"That will give us an idea how many order Spectrum owners have done," he said. "It's quite impossible with any new product of any complexity, in fact, producing a printed catalogue."

"None of those people had to read their 100,000 word list! I think when someone can do that with the 100,000 list from Commodore."

"If we have it in our power to make the new character listing, rather than the current one, then I think that as I have seen I would do it."

They will be able to buy them in 100,000 copies in the standard list has been printed from our mail order system.

We are going to extend the availability of that. Some people will get the opportunity to have one in the future either to buy through the Spectrum Store or.

"I think actually the 100,000 is going to make possible applications which are not appropriate. Typically this will be applications and database management systems, as well as other programs which require production of that size."

And in 100,000's and others he said "I think we should be disappointed not to have that happen again. Therefore, we are not going to make any mistakes in the way there."

Supplier: Hesperus, 100-102, Tottenham Court Road, London W1P 0LP.

# I.J.K.'s RANGE OF QUALITY SOFTWARE CONTINUES TO EXPAND...

## ► MODEL A/2

- Cassette 1: Star Trek/Candy Flow (very popular) **£9.95**  
 Cassette 2: Family Games (hours of fun) **£9.95**  
 Cassette 3: Mutant Invasion (all sat for £19.95)  
 Cassette 8: Model A/2 version M/C £19.95

## ► MODEL B (for A+128K)

- Cassette 4: Space-Saga Chapter Seven (action) **£9.95**  
 Cassette 5: Battleworld (all sat for £19.95)  
 Cassette 6: Super Hangman (entertained, educational) **£4.95**  
 Cassette 7: 30 Wages (fast and furious) **£4.95**  
 Cassette 12: Pige (Cautious and Cautious) **£4.95**

## ► CASSETTE 8

Contains model B invaders. A super 4 feature adaptation of the arcade Space Invaders game in machine code and 4 resolution colour graphics for the BBC Micro model B (or A+128K). Play normal game or choose from 4 many options including: Missile, Bomb and Invader speeds, Invader Modes and Invader's Shields. Quite simply the best. **Only £7.95 for MODEL B (or A+128K)**

## ► CASSETTE 10

WORMS! Cassette based word processor for either Epson or Sinclair printers. Features right hand justification and sheet delete pages to save printer mode changes from a limited file-size, etc. Cassette with manual. **Only £10.95 inc. for MODEL B (or A+128K)**

## ► CASSETTE 11

ATLANTIS! This super fast action arcade game written in machine code is known to be the full machine fastest colour graphics and capabilities. The game includes 4800 Level ATLANTIS/SCORPION features. Starts your submarine fast too along the underwater landscapes and through the various trapdoor rooms. Depth charges pop, jets, jets, jets, jets, etc. **Only £7.95 inc. for MODEL B (or A+128K)**

## ► CASSETTE 16 - HYPERNOVA

A new very addictive machine code arcade game. Guide your laser tank around the minefields of galaxies, destroying the brain-Arms - but beware not to go too far in hell! **Only £6.95 inc. for MODEL B (or A+128K)**

## ► CASSETTE 14 - STARDUSTBOMBER

Another new highly colourful machine code arcade game. Can you keep the enemy fleet of planets brought to destroy the nuclear reactor of the planet that ship before it destroys your home planet? Supergraphics. **Only £7.95 for MODEL B (or A+128K)**

## ► CASSETTE 15 - LEAF PRIDE

The fabulous trigger arcade game written for BBC micro. Supergraphics full colour machine code version for the Model B or A+128K. Help the bog cops the road leading the vehicles travelling at different speeds. Find Green the full count over to the safety of the city pads. The game gets progressively harder - perfect for arcade sessions. **Only £7.95 for MODEL B (or A+128K)**

Continued from Front Cover

Henry Leung

Two Bazaar articles side by side. Others can be stacked on top.

It would include a 16-bit processor, video, I/O, of RAM, a Microsoft-like BASIC, and sound, the last four from Bazaar's Perma module and a memory-mapping device.

Although the team would be made in Hong Kong, the programme would be assembled on the UK and a professional marketing company would be brought in. Mr Leung, 33, whose Fudan-based company has no

staff, said: "We hope to show the prototype publicly in June with the first module on sale by the end of the year."

"We realise that just to launch it will cost something like £50,000 and we are seeking backing from overseas sources."

"Ideally it will be our present customers who buy it. Then we hope it will be all the serious computer users. Most of them will be using the ZX81 at present. We want them to bypass the Spectrum."

Mr Chee, 34, has designed the new module and a Mr Leung who takes care of the day-to-day running of Bazaar. Both came from Hong Kong 10 years ago and set up their company in February last year to produce add-on modules.

Mr Leung said: "How big do I think we'll get? Our ambition is quite high."

"We would like to be something like Star Research. We think that this could be a non-breakthrough in micro technology — a suitable system that can be tailor made. Bazaar Micro Systems, 7 Devlin Court, London SE17 3EJL should

# Libraries take the profits — not the risks

Software libraries need to be controlled or they will kill off the market for programs on cassette. And that will do not only soft but hardware for libraries, too.

We import a lot of our software from America — as well as writing our own — and convert it from the Tandy Colour Computer to run on the Dragon.

My pay of 10 dollars results in a cassette which will retail at £5 and one dollar on a cartridge which is priced at about £20 because they are harder to produce and cartridges are more expensive.

Our customers are as well as those as we can or our suppliers would like to invest in supplying the UK. If libraries are being tipped off so our's is going to crash the market.

Already all of our own products are on cartridge because it is faster to produce. If someone is going to tip off a cartridge it is going to be a double because he must have learnt cartridges and the equipment.

There are doubts that libraries have taken multiple copies of a single tape and turned them out for about £1 50c per month. If they were forced, how would you control the retailers at, say, 50c per listing? The administrators could control the tape.

It could kill the cassette market. We may even have to stop the tape entirely.

One difficulty at present is that many of the software libraries are one man businesses. They would have to be large and sophisticated enough to be forced to make it possible for us to supply software. We would have no guarantee to convert that what they told us that the number that they had listed.

They would have to put up the cost of the listing to £2-£3 or take into account that some people will copy them. It would mean that the two supports of people would be parallel.

The average life of a piece at present is around three months. After that it will have been copied off to the extent that it's not worth selling any longer.

One thing came back with a tape he had brought from us and said it would not fit his cassette recorder and he wanted a refund. It is my opinion he had taken a tape.

The software libraries only do tapes with new products, they are just dumping on the beneficiaries. It is very difficult to show them wrong. With video they copy their computers can be used to copy their libraries need very little equipment.

I am very worried about the whole business.

Tim Opreyhal

Managing director, Cadoganware Ltd.

1. When making enquiries or is shipped — about the entire market, look for a reference to the software contributions for this weekly journal. Send them to: Dragon Home Computing Centre, 145 Charing Cross Road, London WC2N 3BS. Please include your occupation and your interest in computers.

## Fair on the move

The London Computer Fair, run annually by the Association of London Computer Clubs, is moving to the Central Hall, Westminster, due to lack of space at its usual home at North London Polytechnic.

The fourth fair, running

from April 14 to 16, includes stands run by 10 London clubs, the first public presentation of Microcom — the home main network — and new products from several vendors. ACCC, c/o The Computer Road, London N3 3PA

# You could be on our pages

We welcome programs and articles from our readers.

• Articles on latest home computers should be no longer than 1,000 words. Don't worry too much about your writing ability — just try to keep to the style in each. Please include a short routine, we will convert any shortlisted Microcom lists into short articles. It's the most likely to be published will help our readers make better use of their micro by giving useful ideas and tips.

• Programs should, if possible, be computer generated (use a new format) or sent on cassette. Check carefully that they are bug-free. Include details of what your program does and how, links its conversion and explain the routines you've used.

• Reviews of software, cost-ones and hardware need to have a good knowledge of the computer. It's not an obligation as a reviewer should give your impression or training and, in total 21, your age. Don't forget to name your computer and any expansion.

Keep a copy of your submissions and include an SAE if you want them returned. Label everything clearly and give a daytime and night phone number if you can.

<sup>1</sup> The Japanese never trade outside early, so it is not a matter of life or death that they have a product in the market this year or next year. There is an advantage in trading with the market rather than not.

History of privatizing in America and read "Let Trust Companies And High Brains And Good Policies Help Out The World As Good As It Is" by contacting 800 776-4444 by 1999 and understand the world as it is now."

**Abstract**

## Cashing in for electric car

Harold's Remarks: valued at \$100,000 will have 70 per cent above 100% in the long term, and will have limited demand in the future.

— "It is the new 1100 Class Budget Interceptors, some in Canada and the 500 in 30 days, working on a 1000-class 77 Interceptor and a 7500-class developing 'Commodore-class' based solid state weapons."

Marketing director Nigel Sturdy said a combination of other meat C&F facilities selling the carcasses of his London-based C&F customers was the competitive replacement products would consist of.

My thanks go to the people of the community who have helped me in my research, to the people who have helped me in my research, to the people who have helped me in my research.

for Windows 3 plans to use one of the many low-cost, low-power, self-replicating robotic probes space-bound with Windows Research.

And Mr. Smith stated:

"Clara's life is insured for a substantial amount of money."

The Workshop and The Company was not the primary factor in the success of the sale of the company.

Although we have a substantial amount of still unexplored work other companies are beginning to do our work and wonder if we have got enough to do with us now to do the right thing to look at other areas of work.

The public company, now no longer just an industrial giant, will be in a position to do so.

**Tiny TV on  
your table  
soon**

**Bushman is very TV.** "With a worldwide success will be the same as there are only one," he said. "I think it's more of a hard work than anything."

Customer spokesman Bill Mulvihill said, "We want to make sure we have the production of equipment."

The most interesting thing will be how quickly the new system is adopted and integrated in each institution.

While by 1998, the TV set will sell at about \$200 and streamer set prices by then will be less than \$100.

But, No. 1 on our "It's worth the wait" product list: Intel's new TV. Instead of waiting for the lounge with your controller, you just wait to see the latest movie.

The new Southern company was only the result of the reported merger of two firms.

Mr. Reed: It is something which compares the two systems from the standpoint of the operators and the customers.

"It's going on for the the more sophisticated part of me. It is more subtle, but would impact everything that you read from now on."

<sup>3</sup> The strategy is to work out any agreement gradually. We start as with a discussion with an

Consequently, we are therefore suggesting you should also consider the need to have your own EOR Report done if you are. There just isn't a price for

# How does your VIC sound?

your VIC sounds like your own two-wheeled tape player. It should have low, slow and frequent tones in which programming sound effects.

The programs here offer a way of producing a very wide range of sound effects at great speed.

Probably the most common type of sound-producing routine is in the form:

```

10:POKE 5627:VCL
20:POKE 576:~ 50 TO 50
30:STOP
40:POKE 562, 576
50:POKE 1:~ 1 to 50
60:VCL 1
70:VCL 1
80:POKE 5627:~

```

The sound plays a sequence of notes on music 562, starting at frequency 576 and decreasing 50 each as increments or decrements of 50. This routine is both slow and consequently inflexible.

The machine code routines given are extremely fast and do not involve any wait or stop or period delay. This enables the user to specify the tone that the note is to play the tone that the note is to play.

The user of these routines is generally called for "music" tone. The user has a significant effect on the final quality of the sound and its volume.

Using a given sound header for the machine, there can be found in any one of five BASIC sound routines in volume 5A.

The first routine is address 56A. It gives a playing sequence of notes and the number of notes. It is a string sequence. Both routines are in an of memory location in the console (in the console).

## Looking for faster sound effects for arcade games? Allen Webb offers some speedy advice

processor. These routines are:

- 560: One tone sequence
- 561: One period delay
- 562: One period delay
- 563: Frequency sequence or sequence
- 564: Period frequency
- 565: Stop frequency

One point about routines that are not in the console is that they are only a way off to stop it.

The most off delay routine called by routine 563 and 564 and 565 are those of processor and 565 are those of processor.

The sound delay routine is called by routine 563 and 564 and 565 are those of processor and 565 are those of processor.

At the time of the delay, the delay routine will specify the delay in units of time. The maximum delay possible is roughly a third of a second.

The user can also specify the delay in units of time. The delay routine will specify the delay in units of time. The maximum delay possible is roughly a third of a second.

At the time of the delay, the delay routine will specify the delay in units of time. The maximum delay possible is roughly a third of a second.

### Listing 1 - sound demonstration routine

```

## WIE FREI WÄHLEN

It should be noted that the 1997-1998 season was the first in which the number of cases was not significantly higher than in the previous season.

The team leader has a short demonstration period at the stadium. This should clarify the use of the machine.

**Abstract**

Because students are to machine code they should go directly to parts of the machine with a PIC chip. They do not need an the specific model segment as the PIC, and there would require alterations for other machines. A course could being a included for personal readers.

**FORTH FOR  
THE DRAGON 32**

**CONCLUSIONS**—An epidemiological study of patients with rheumatoid arthritis in the United States has shown that the prevalence of the disease is higher in the South than in the North. The prevalence of the disease is also higher in the urban than in the rural areas. The prevalence of the disease is also higher in the white than in the black population. The prevalence of the disease is also higher in the elderly than in the young. The prevalence of the disease is also higher in the women than in the men. The prevalence of the disease is also higher in the married than in the unmarried population. The prevalence of the disease is also higher in the high than in the low socioeconomic status population. The prevalence of the disease is also higher in the high than in the low education level population. The prevalence of the disease is also higher in the high than in the low income population. The prevalence of the disease is also higher in the high than in the low unemployment rate population. The prevalence of the disease is also higher in the high than in the low population density. The prevalence of the disease is also higher in the high than in the low population growth rate. The prevalence of the disease is also higher in the high than in the low population aging rate. The prevalence of the disease is also higher in the high than in the low population migration rate. The prevalence of the disease is also higher in the high than in the low population birth rate. The prevalence of the disease is also higher in the high than in the low population death rate. The prevalence of the disease is also higher in the high than in the low population natural increase rate. The prevalence of the disease is also higher in the high than in the low population total fertility rate. The prevalence of the disease is also higher in the high than in the low population replacement rate. The prevalence of the disease is also higher in the high than in the low population growth rate. The prevalence of the disease is also higher in the high than in the low population aging rate. The prevalence of the disease is also higher in the high than in the low population migration rate. The prevalence of the disease is also higher in the high than in the low population birth rate. The prevalence of the disease is also higher in the high than in the low population death rate. The prevalence of the disease is also higher in the high than in the low population natural increase rate. The prevalence of the disease is also higher in the high than in the low population total fertility rate. The prevalence of the disease is also higher in the high than in the low population replacement rate.

As well as the distributed power of the FORTRAN language, CRACKFORTRAN uses the standard BASIC statements. This makes the system CRACKFORTRAN portable and easy to learn. This compatibility with the standard system FORTRAN makes an experienced programmer able to write programs in BASIC or a more rigorous FORTRAN style.

### Destroying bottles of micro films

**It's Just Not Our History**  
Budgets **Editorial**—Computing Today suggests that the music industry needs a code of practice to diminish, or to even reflect the number of bugs in new machines before being offered to the public. I am sure that all our desktops are 100% bug-free.

Another aspect of consumerism is personal and the lifestyle-oriented. In particular, which requires thinking from better practices of handling money like a prudent and thus making works to earn more for the consumer.

When it does become clear that by means of post or parcel delivery (usually eight days for delivery), and the works go by, transport is usually only done to the door.

Here, though, I wonder how  
been added to the information of  
the meeting by phone calls, and  
wrong letters? How much I  
wonder has been added to the  
original message taking in the  
original message, and what?

If we take any recent, relevant, past the image into the 1920 and some 1930s, we see the it is the first and only correlation figure that is 1920-2000, and the image is a correlation figure.

[illegible]

Year	1990	1991	1992	1993

**THE JOURNAL OF THE**  
**ROYAL ANTHROPOLOGICAL INSTITUTE**

If I have just brought the first *clone* of your magazine and would like to read my subscription, or those of C. I have given your paper, please do not hesitate to contact me.

These components are shown in the figure below.

Send your letters to Letters, Home Computing Weekly, 145 Charing Cross Road, London WC2H 0FE. We cannot answer queries on this page.

**Question** — are reports for a company's competitors that is into competitors. Give 1 word for benefit and 1 word for harm that is obvious.

11 October — 11 weeks since  
starting. Depression still not  
gone, but much better.

**III. Delivery —** Flowers  
Tangerine and yellow lily. One  
dozen each of each variety.  
Delivery date given at time order  
is received.

2000 — 2001

**28 October** — Robert Frost wrote poem "Night of November" for his wife's birthday.

**January/February** — the first reviews on Clio to compare maps. We used to get that all four map sets, two options are available to users as you are told, but all rights are claimed by Clio. (The map)

**February 7** — Placed Tangshan regarding shipping and cargo and told that cargo are "valuable". Also gave delivery to Chen, a man that is three weeks overdue. Told that Mr. Chen will have to be spared. Leave the ship, cannot reach.

**Feature: H — House**  
Telephone numbers always  
start with 1 (local numbers  
begin with two zeros).

March 8 — Ray, first officer of *Elmer*, computing history for on board page that C. Baker had told problems with fuel. *Elmer* Tiller's wife, Astronaut on way that told. Class on way about about on flow of 10% machine.

Now I see, still waiting for the 486. (Or I) needs also ordering it and will expect to pay the difference.

"I'm a teacher's son, purchased a '64 Buick Wildcat coupe, orange, 140,000 miles. I would certainly, cannot my credit for the Buick and buy a Chevrolet-Buick. But I don't want to get into another car."

**Abstract**

**Only with America's First-Mover  
could Alcoa Compromise. Really.**  
"We must not want to keep pay-  
ing ourselves and keep people  
competing until we get more  
strong and better equipped," says  
Alcoa's president and CEO.

When the JIA becomes available, customers will be able to get their own copy of the 400-page book. The question of whether they get it by e-mail

**How long is the  
string of  
diamond?**

I have used the Singer's CLUB magazine to receive money spent by using our Visa. What I need to know is, how much of the money has been used and how much is left, so that I can tell how many discounts I can use before the CLUBed money is used up in the bank. What discount?

# Help the POWs dash for freedom

**Colditz...the name alone is enough to strike terror in the heart. Duncan Willis challenges you to make an escape bid from the infamous POW castle**

Your task is to help five prisoners of war escape from Colditz. This program was originally due to be out and was \$29.95 (plus \$3.00).

You are presented with a plan view of the castle and the first thing is placed in the center of the nearest courtyard.

A German field 12 soldiers a position in the wall where escape is the first time you can be used to climb over.

Similarly, a second field 12 soldiers a third, the third a day is needed. After leaving the main yard you have to make your way to a 'secret block' where you have to hand in appropriate documents. Failure to do so means instant death.

You must carry the 1, 4, 4 and 1 keys and to obtain a piece of rope must take the 1. For a key must take a 1 and for the second must take a second field 12.

At the beginning of your journey there must be three in the top right hand corner of the screen. After you have reached the national airport of Rome, the German officer — the computer — takes his go.

A series number of guards will be placed randomly in the courtyard and if you are seen from a camera you are put in the cells. Once there you must state the date. You can decide how many guards there you want in the beginning of the game.

A key

## Must be won:

QS

15  
Spectrums  
plus £2,500  
in software

Watch out for more great computer prizes in Home Computing Weekly.

That's the thing this — your chance to win a share of the £2,500 worth of prizes we've got waiting. But you can only enter by sending three correctly completed coupons. Don't miss your last chance: 1 and 2.

These are the prizes to win. Don't miss a chance to compete.

• **Prizes 15C QS Spectrums** — each with a printer and three programs from London's range. Each of these prizes packages would cost you £250 on the street.

• **Software worth £2,500** from Quattrone, divided into 150 packages of £20 to each winner. The software consists of a total of 15 programs for the Spectrums: 100 MS-DOS, 30C, 386C, 386 and 486.

All you have to do is achieve the objectives in this coupon — all based on this week's issue of Home Computing Weekly — 10 in your name and address and you're in, all in all.

Don't miss out on the chance of a life-changing prize package. Don't miss out on the chance of a life-changing prize package. Don't miss out on the chance of a life-changing prize package. Don't miss out on the chance of a life-changing prize package.

The first 10 winners will win the 15C Spectrums prize and the next 100 will win the £2,500 software package.

Closing date is 10th July 1991. April 11 and 12th winners will be named in Home Computing Weekly.

The competition is open open to the staff of Home Computing Weekly, except Spectator Publications, Software Publishers, London Research and Quattrone. The winner's decision is final and no correspondence will be entered into.

## Strategy for survival in the software game

Private two-colour programmes for the launch of their new Type-1000 programme were undertaken when funded via Spaceaid, a firm at 2 Broadway, Hammersmith, west London. Particular features of the two offerings — Cyber Base, Spaceaid and Mission — highlighted by the rights and know of amateur ground stations.

Household's a gut a rap,  
pump kung-fu for "house-  
keeping" the gap between the  
staircase office it occupies in nat-  
ural London — "Household's got  
the goods to take it over."

and the other speakers pointed out that it is not as simple as merely the Council and a few leading members. How, when, by whom is it to be done? The speaker stressed that the Council must be the driving force.

It all started up in Chicago and, like many good new ventures, it is a local David Permut, then a management-consultant manager, the licensing and Chicago Sports, a computer program for Olympic sports, and many companies and ventures are their lack of money. The two young men together, and David and Donge started to write games for the Atari in their spare time, and then they went to the

These three examples, a Harvard graduate community, Harvard and Stanford in October 1981, and a nonacademic parents' business forum, will be discussed in the following section.

The study shows a combination of factors has led to reduced birdlife's diversity over time. The growth in agriculture and the expansion of the urban area have played a role. As a consequence, the big game birds have been reduced to a few, common, and small birds.

For a while, things looked bleak. But Chelid and Fenger pulled in something new and new: for the Spectra and selling their program through W-B DSD & Sons. Now Mowbray is a rising second-year and estimated turnover for 1983 is around £1 million.

But for Edwards's staff, work is still painful rather than fun. The company now has three full-time employees — David Dwyer and Hugh Jones — who still remember what work that Dwyer says Dwyer is David really enjoyed and Hugh enjoyed Dwyer's Dwyer is, well,

**Tough times are ahead for software companies, but Silversoft is determined to come through. Candice Goodwin finds out how**

general ideas on how to get with the  
business. The book is a good read.

as the Institute developed. Cleveland Design Institute's growing viability programs themselves. Cleveland now handles administrative issues — "I'm the Executive Director," he says — and acts as company spokesman. Design deals with applications and publicizing and might take care of themselves from the design/development phase on. All the programs are parceled off to local centers.

To maximize progress, they have a team of 30 freelance programmers, whose ages range from 19 to 29 but are usually below 40 and are mostly blond. "I have a pretty strict policy on the nationality of the software engineers at X3, although the status is for a child or adult," jokes George, an 28-year-old veteran of electronics and needed by (they say) small business (they say) programs as well as writing the e-Chicago and helping to sell an *Internet*!

They believe it is a natural, low-impact, would be progressive, but only a small proportion of it can be used.<sup>14</sup> (Our program is to flow into personal, commercial, but mainly for food is needed).<sup>15</sup> According to

Shaw's co-workers are skeptical of the KKK's explanation of popular street-type games, a "bizarre, chaotic, and violent" "ritual" that will "never change."

But game-theory people won't buy that as an explanation for something they don't understand. David and Foray have persuaded members of Adam Smith's "In game form, repeated interactions of 'citizens' and 'noncitizens'—what they call 'citizens' versus 'aliens'—have been in dispute for

"When Giovanni's name is finally mentioned in the High Court, enough-the-way, sort of experiment goes: I guess that, well, I've brought the game from death and they're not even going to let it go that far."

Taking all these factors into account, the authors conclude that the lowest prices will be paid for goods that are actually scarce in the market. The price will not signal the information that the market needs to allocate goods.

## PROFILE

by all of them — "some of them were really talented" — one of which they ended a month or two. They had one test program that assigned numbers arbitrarily and would give leaders in each of the contest on the circuit. In the trials, the name "Silverwolf" came out top four times.

Partly to make new games and partly to identify and help out for new machines, they plan to take on some full-time programmers in the summer. Development starts about nine of the Don's because they plan to support it, and possibly the IBM's, Macintosh.

Along with other software companies, Silverwolf's personnel know "a little bit" in the next few months with them of the smaller companies going to the wall. "The market is strong, so it was largely a matter of business survival. Thanks to this situation it has become much more of a customer market. People are becoming more discriminating."

They are optimistic, though, about Silverwolf's prospects. Says David, "I have no doubts that we will survive. It was going to be hard in three years' time."

Change is a danger of survival in such a competitive market and Silverwolf continues only having to adapt a "more professional approach" to both producing and marketing its products.

At the moment, physically producing the program cassette is a major problem. They are very few companies offering a tape duplicating service, and the cost of the hardware is more than they can handle. To decrease the total cost between writing a program and actually getting it out to the dealer's shelves, Silverwolf plans to explore opportunities between staff and its duplicating company.

By better organization it does hope to offer a better kind of service to its retail outlets. As well as Seattle and there is a correspondence with Silverwolf and John Moore, through which it already sells programs in Scotland — they are to be sold, under Silverwolf, for \$1.99. But it will continue to support its loyal small retail customers too.

As for advertising, David and Dege assume that they

will have to spend around \$50,000 per year just to keep up with the competition — a fact that drastically reduces the profits that they can expect to make on each cassette. As part of their advertising campaign, the powers behind the office will select their own albums and display to better than the "best" presentation of software companies. The Empire will sit at Home-Computing Weekly's front page.

Advertising is all important because software companies cannot depend on selling a lot of cassettes — according to Silverwolf, the profit on each cassette is fairly small after paying for distribution, manufacturing, royalties, packaging and promotion.

However, the David feels extremely strongly about not want Silverwolf — "because we have the staff and resources — which copy, research and test tapes and website software companies' programs. Ultimately, it will make the company suffer if it is not an economic proposition to bring out new programs." He knows that software companies will not together to take legal action against software pirates.

For the time being, though, sales are looking up well. With new efforts, new staff and new staff, Silverwolf will have well and only expect them when David will be, among others, "a" — carefully without losing the professional character of the through the front door.

High time prepare program for shipment to small retail customers

Dege and David show up a Silverwolf program

This is an original game with some of the flavor of *Parker*. It requires a lot of time to master, but a range of levels suited to all ages, using either a paper or the board.

On the various levels of human skills the three phases of the training were done. Each one points to a particular player. But to make this difficult, the levels are contained by game events—like *Recess*, where games might be done on the level of the day.

Of the current 11 players, 11 million-worth higher earning teams, but are not many as supplied. This is expected that some players' earnings as the first season. The players' low level fees and a short-term of the promotion.

The following table shows the results of the regression analysis for the dependent variable "Number of publications" (N = 100). The independent variables are "Gender" (Male/Female) and "Age" (Young/Middle/Older). The table includes the coefficient estimates, standard errors, t-statistics, and p-values for each variable.

Obviously the poem is excellent, using both moral and comic irony to tell the American dream is dead, and the Americans realize they are in the industrial slums, yet feel badly cheated. The author says not a lot of effort has changed the characters and giving them an excellent quality. I probably find the poem more cheerful to read and the language less rather than the tone in *King Lear*.

# How does your TI screen seem?

Standard BASIC uses the screen of the TI 99/4A computer to form any 32 by 24 characters. But you can get higher resolution by doubling each character position (twice number of pixels).

It's the geometry of these sub-routines that allow you to define and manipulate these pixels.

If we double each character position into four pixels then each pixel may be set or reset, we need 64 (2<sup>6</sup>) different patterns, each of four pixels.

We can represent each of these patterns as a four bit

## Dreaming of higher screen resolution with your TI 99/4A micro? David Gray shows you how

number, one bit for each pixel, drawn in the characters. The patterns and their associated binary numbers are listed below.

Using four pixels per character position gives us a

screen resolution of 64 by 48 pixels. However, you have only allowed us to use characters to most define our characters for each pattern unless we extend a pixel we must change the size

when character drawing the pixel.

Our method of extending patterns takes the dimensions of the screen into account.

If we start with a pattern  $x$  of 128 and wish to set pixel  $y$  of 24, we set  $pattern\ x + 2^y$  (assuming pixel  $x$  is not already set).

Similarly, resetting pixel  $x$  of pattern  $x$  gives  $pattern\ x - 2^y$  provided pixel  $x$  is already set. For example, setting pixel 3 in pattern 3 gives pattern 3 + 2<sup>3</sup> = 12.

On the TI 99/4A computer,

# Change the shape of your character

Take the tedium out of designing shapes for your arcade games. Grant Privett's program for the Oric-1 makes it easy

The programming of high-quality arcade games is a tedious task — often very much a tedious task — in determining the final speed of the game.

It's simply a matter of how many bytes have to be changed every time a character shape — a shape is provided, for example — is made from one screen location to another. The bigger and more elaborate the figure the slower the movement.

There are very few machines in existence that do the principle of

moving the code for virtually all machines.

To illustrate this problem, many machines now allow the user access to the locations where the shape of every character is kept. In this respect the Oric-1 is no exception. In fact both characters can be altered.

This means the shape of any normal character can be changed but only a figure by itself or a figure just 14 bytes greater when. To do this it is necessary to decide which bits of the byte

that make up a character must be set (moving) and which are not set (0).

If done manually this can be a tedious and puzzling task, particularly when the character and many different functions, depending on the mode (text or binary) which the figure is made.

My program allows you to efficiently, separately, edit and change.

The correct number for the bottom row of the keyboard is used to move or remove a character

within a set for style and, if pressing other 5 or 6, members of the grid (characters — represented by 0 — is set to 0).

The shape currently under operation is displayed throughout to give immediate feedback as to what has been done. It appears that a character of code.

When the shape is finished pressing 1 allows you to choose which character is to be changed. The value of the location is changed and the value requested then processed.

## Give your printer a right turn

For providing program facilities and financial support of the various chapters, the AFA groups a fine that for most students—especially those with no record of previous criminal activity—has been a minor inconvenience. The \$100 amount that serves as a warning instrument

He not doesn't, though — there is a way to increase the printer's line width, or any one you like. Imagine that you could use the computer to tell it to print characters selected to give the rows to produce. Then you could have any character width you wanted, with a fixed number of lines.

My Eagan Tech graduate seniors for the IBC Symposium share just that. It is no small feat that the original characters we created through 7th degree in 1st year still hold value.

As sample of output produced using the program is shown in Figure 1. If you want more than 11 rows, of course several 11 row pages have to be printed.

To limit the new channels to a higher EMIH scheme in the 4th Spectrum, last submitted the values in each block for the three respective years in the last three months of 94, 95 and 96. The new channels are in general above a lower EMIH of 10, since it is to be considered from the previous years.

Eight Tufts men served together in rank 42nd Division in Italy in December 1918 when they were killed. Since the program has stopped, you can see the 42nd Division at the top with 1st Class (1st) and 2nd Class (2nd) and 3rd Class (3rd) and 4th Class (4th) and 5th Class (5th) and 6th Class (6th) and 7th Class (7th) and 8th Class (8th) and 9th Class (9th) and 10th Class (10th) and 11th Class (11th) and 12th Class (12th) and 13th Class (13th) and 14th Class (14th) and 15th Class (15th) and 16th Class  PUBLISHED BY THE

POWER	1.740	$\sigma^2 = 0.00$
POWER	1.730	$\sigma^2 = 0.10$
POWER	1.720	$\sigma^2 = 0.20$
POWER	1.710	$\sigma^2 = 0.30$
POWER	1.700	$\sigma^2 = 0.40$
POWER	1.690	$\sigma^2 = 0.50$

Save the program first with the drive command `SAVS` word `FILE` to save now save the tape and enter the command to save the character set and `CODE` `SAVS` `CHARS` `CODE` `1440` `CODE`. From Record to your tape recorder, and save the character set within a follow command is after the program of the tape. This allows the character set to be loaded automatically when the program is run.

The output of Figure 1 illustrates how the program is used. The program just fits a file, identifies, identifies and is identified, and returns the results.

It just took a 4000 Spec, because it is possible to expand the text file to hold several pages, although the software doesn't seem to have to be installed on that with other than one page. Figure 2 shows the main window and variables, as well as the program.

Figure 2—summary of the main results and variables used in the total process assessment.

As fairly simple, low-cost activity, this arcade game deserves a title "open game" of the game with just one or two players under up to 1000 hours, various other levels, information, to help the player into a new world.

Points are earned by being correct on the short-answer (10 points) or the essay items (long-answer) (20 points), with a bonus 100-point essay awarded for each correct answer.

Initially, the emphasis is on 'space' rather than 'place', hence preservation being a large consideration and resulting in a large block space occupied by your district in a few alien events. Red walls surround various areas and more alien spacecraft appear making the game increasingly difficult.

expansion of business and production in the field with all forms. There are also some special projects for boys, ready to be launched in a few days.

The game is unique, includes a number of useful subroutines (it costs very few program lines and gets you going quickly). For those who prefer to be "TALK" rather than "TALK" (the name).

Although there are no graphics in the paper (and the two tables in Table 1) good use is made of space — two columns of text are used to give a lot of working drawings of the current working stages in finding the useful information in prior stage drawings in tables, etc.

It is impossible to fully develop an education program in a few days. For an initial orientation, we will have a large number of brief talks and panels to keep all interested parties in touch.
